Dr Katherine Gordiev Rehabilitation Protocol Total and Reverse Total Shoulder Replacement

The intent of the following protocol is to provide physiotherapists and patients with a guideline for the post-operative rehabilitation course. It is not intended to be a substitute for clinical decision-making regarding the progression of a patient's post-operative course based on their specific procedure details, examination findings and individual circumstances.

Dr Gordiev will communicate with your physiotherapist regarding your surgery and the postoperative protocol. If clarification is required, please contact Dr Gordiev.

Review dates with Dr Gordiev after surgery are as required, but typically:

- 8-10 days
- 6 weeks
- 12 weeks
- 6 months

| Weeks post | Instructions/ Exercises | Restrictions |
|------------------|---|--|
| surgery | | |
